The difference between dressed, and well dressed."

# These Polaroid cameras know a sharp picture when they hear one.

What you're looking at are the two most advanced cameras ever to be called instant. They actually listen for a tack-sharp picture.

# The Sun 660 and the SLR 680. What they hear is what you get.

What makes them unique is Sonar Autofocus, a remarkable electronic ad vance that sets focus by what it hears. Not by what it sees:

Not by what it sees:
Knowing the speed of sound, the cameras can judge distance by measuring
the time it takes sound to travel from
you to your subject and back again.
In both cameras, sound generated by
electrocal purples travels from a

autofocus systems that read light rather than sound. But optical systems might be fooled by certain combinations of color and light. Which is precisely why Polaroid pioneered the sonar system.

#### There's more to these cameras than Sonar Autofocus.

Our folding SLR 680 is quite simply the finest instant camera over made. It's a single-lens reflex, with a four-element glass lens and a strobe that titts according to the distance of your subject.

The Sun 680 is our top of the line Sun

Camera. It features many of the same

cus at the speed of sound. Electronic impulse shoots sound waves words subject and back, felling your commit hore for every he is.

transducer to your aubject. Once the signal has been sent out, the transducer becomes a tiny microphone, receiving the impulses as they return to the comera.

Elapsed time is measured. Distance is calculated. Focus is set. At the same instant, aperture size, exposure duration and strobe timing are also set.

Now your Autofocus camera is ready to take a sharp picture. And all this happens within 70 milliseconds.

Other suitofocue comers-makere use

advances found in the 680, but lists at less than half the price. Either camera lets you take incredibly sharp, clear glowing pictures in less than the blink of an eye.

And that should be music to your ears.
Call Polaroid toll-free (800) 225-1384.
In MA, AK, HI, call Polaroid collect (617) 864-4569.

#### Polaroid cameras make the difference.

## Just a word about the price of The Glenlivet. Preposterous.

Is the premium we place on The Glenlivet really so outlandish? No more so than the premium placed on great vintage wines and fine champame cognacs. The reason? Taste, Just one sin and you'll know that

The Glapliant has a tasta that's without equal. The Glenliver is Scotland's first and finest single

malt Scotch, from Scotland's oldest licensed distillery. And, iner as it always has been, this 100% Highland malt whisky is distilled from natural spring

water and fine malt barley. then aged in oaken casks.

Only The Glanlinests time-honored methods can achieve this unequaled taste. A roste that sets us apart. Its smoothness, body and bouquet are qualities found only in this

unique Scorch. Of course some people may still insist that The Glenliner is too expensive. We have just one word to say about that

Preposterous! The Glenlivet

### The new Xerox 1020.

### The world's smallest Marathon

Finally there's a conject that's as rugged as it is compact. Introducing the newest Marathon

conier The Xeroy 1020 It's just 17" square by 11" high. yet it comes equipped with many features you'd expect to find only in a big copier. For instance, the Xeroy 1020 has five contrast settings for

colored or problem originals, so linework won't break up, solid areas stay solid and different shades of blue writing, light pencil, green and red inks and vellow crayon set clearly conied

And the Xerox 1020 conier only takes 35 seconds to warm up. After that, all it takes is 7 seconds until you get your first copy. But what really makes the Xerox 1020 a Marathon

is how it's been designed to run The 1020 copier's powerful micro-

processor and other advanced electronics have greatly reduced the need for moving parts that can break down. And every one of the

Xerox 1020 Marathon conjer's major components has had to pass an unprecedented

array of stress tests. But one feature the Xerox 1020 Marathon conjer doesn't share with hig coniers is a hig price. In fact, at under \$2,000.

the 1020 is the lowest-priced copier Xerox ever introduced. All of which makes it a copier you can afford in the

short run while it works for the long run. The Xerox 1020 Marathon

copier. Built to shatter the record for endurance

# AT&T. **REACHING OUT IN NEW** DIRECTIONS.

Suddenly, it's tomorrow. And it's been accurately labeled the Information Age.

The telephone and the computer have become one.

Technology has married them forever.

The way people exchange information will be transformed by this new telecommunications

technology.
It's a new world, full of promise and

potential.

And into it steps the new AT&T.

A company uniquely equipped to reach out, take hold of the future, and deliver its benefits to you and for America

#### WHAT'S PAST IS PROLOGUE.

It was AT&T's concept that made the American telecommunications system the wonder it is today.

It is AT&T's standard of service, of innovation, of excellence that has created the most extensive, most efficient, most reliable communications system the world has ever known. One that is constantly being refined and expanded.

The new AT&T is not turning its back on this heritage, but building upon it with the latest products and services.

#### TECHNOLOGY MADE IN AMERICA.

New technology is nothing new to us. The transistor, the laser, the solar cell, even sound motion pictures and high-fidelity recording, all emerged from the unique creative environment that

Creative environment that continues today at AT&T. Our Bell Laboratories creates the technology that sustains AT&T's reputation for world lead ership in moving and

managing information.

With more than a century of manufacturing expertise, we transform that technology into reliable, state-of-the-art products and

systems that keep us a leader.
For example, we were the first in the
world to mass produce the 256K memory
chip. These microchips are evidence of
of electronics and bring new products into
the marketplace. In all the technologies
viat to tomorrow's information systems
and services—microelectronics, photonics,
digital systems, software—we will continue
the marketplace in all one whose degree
and new anollocitions.

#### NEW PRODUCTS, SAME PEDIGREE.

We don't create this high technology for its own sake, but for yours. To improve the efficiency of your business and the quality of your life.

And AT&T has developed new products and systems to do exactly that.

For businesses large and small, our complete line of communications and information management systems helps deliver the twin benefits of increased productivity and

greater profitability.

We've established over 200 sales offices staffed by account executives and technical support people to meet your business needs. For your home, AT&T makes phones and other communications

products that can remember. compute and perform a host of programmable functions. And ours is not temperamental

technology. Even our newest products and systems share our oldest feature - reliability. The reliability

demanded by Bell Laboratories and Western Electric

#### REACHING OUT ALL OVER THE WORLD.

Our long distance network is the central nervous system of modern life. Calling long distance has become as natural as calling your neighbor. The AT&T communications

network is the only network that can handle 23 million calls a day.

Reaching everywhere, it serves the needs of homes, businesses and the government more completely than any other network on earth. Our network delivers voice, video.

data, even sensory information to every corner of the world and employs every advanced technology from lightwave systems on earth to satellites in space. It's at your service any time, anywhere, across the nation and around the world

#### WE WORK FOR YOU. Nearly 400,000 of us. No company in America has a

stronger tradition of service than the new AT&T-a tradition built upon our commitment to customer satisfaction. This concept of service begins with our scientists and engineers, designing and producing reliable products and systems. It continues through our sales and marketing people, who

work with you to apply this technology in ways that specifically serve you best. And, of course, there's our service organization itself. Pro-

fessional, dedicated, and nearby no matter where you are. Our century-old spirit of service is our competitive edoe

#### FREE TO COMPETE. AND EAGER TO.

The new AT&T is free from many of the the restrictions that bound us in the past. So when Bell

Laboratories, for example creates another device as revo-

lutionary as the transistor, or the solar cell, or the laser, we will be free to pursue potential applications wherever they take us.

And we intend to do so with all the tools of the competitive marketplace. We intend to compete for all we're worth. Not just in America, but around the world.

We're determined to see to it that America remains the world leader in telecommunications technology.

Tomorrow has come suddenly. but it hasn't taken us by surprise.

We've been preparing for it for 107 years.

Old habits don't die easily Sometimes even when they come face-to-face with exemulation

ing common sense.

Look at our charr

Common sense would dierate that when you can place the same call to the same place and save up to 50% it would be feeled not to

That's who care holf the Fortune® 500 and pearly 300,000 other companies, large and small,

have joined MCI. But some companies are still

thinking about it. And while they think about it. their competitors are enjoying the savings you see on the chart

How can MCI charge lose than Bell for the same service? Very simply, MCI is run more efficiently than Bell

We've built our own perwork from coast to coast exclusively for long distance calling. Our equip-

ment is newer and more advanced We can also give you flexibility Every business has different needs. So we have different plans for you to choose from.

The total savings over a year can be enormous. An inclusival company saved almost \$900,000. An automobile company, \$800,000 A government agency, \$700,000.

Call any phone from coast to coast. Also Hawaii, Puerto Rico and major areas in Canada.

Some businesses have wondered if MCL goes everywhere they

Now they can stop wondering. From most major cities you can now reach any other phone in any other state from exact to coast Even the most remote phone in the most remote town

We also provide service to Hawaii, Puerto Rico and major business cities in Canada If you would like to know more

about MCI's services or our telecommunications seminare offered throughout the country, we'd be happy to send you addingood

information. Simply mail us the Or call your local MCI sales

office. Let common sense present

# It's harder to build a German engineered sedan for \$13,000 than \$30,000. Power steering. Power brakes. Power windows. AMV/FM sterego/cassette, Electrically-adjustable mirrors.

German engineering has solved some of the toughest problems known to the road. With imagination that borders on genius. And precision that borders on per-

fection. But at an expense that can border on absurdity. So at Volkswagen, we set out to solve the toughest problem known to German engineering: to build a European arand touring sedan—for less than \$13,000,

Introducing the 1984 Volkswagen Quantum. As standard equipment, it has everything you ever wanted in a grand touring sedan—but were afraid to pay for: Air-conditioning, Electronic cruise control.

Power steering. Power brakes. Power windows.

AM/FM stereo/cassette. Electrically-adjustable mirrors. Tachometer, Even a central door-locking system.

Unique Valleswagen engineering is standard, too. The Quantum's 2.2-liter, 5-cylinder engine gives you the smoothness of larger-size engines, its rear axle seemingly "thinks" for itself and virtually eliminates any steering by the rear wheels when cornering.

The Quantum gives you all the comfort, performance, and handling you'd expect to find in a sedan costing almost 3 times as much. While it's harder for us to build the Quantum for less than \$13,000, it's easier

for you to buy. r you to buy. The 1984 Quantum \$12,980. It's not a car.
